

I would like to say that the main reason that I have XM Radio is for the variety of music with no commercials. Also, it is a huge plus for when I am traveling that I don't have to take my attention off the road to fiddle with finding a local radio station to only have to wait 15-30 mins to find out the local weather and traffic reports. I love having the convenience of those channels where I don't have to search for the local radio stations. I don't understand why the NAB is trying to curb these channels, they sell advertising on those stations just as a regular station would. They have to understand that not EVERYONE has XM radio so they are only losing a small portion of their listeners to this. I would be very upset if the traffic and weather channels were taken away.
